You don't need to travel to southern California, Texas, or Florida to play in a world class tennis academy!

Front Range Academy

The Front Range Academy was founded in 2015. The FRA offers a very affordable and flexible 20 hour/week year-round tennis academy to high performance junior players. FRA runs an intense program for dedicated middle and high school players that includes coaching from certified teaching pros and college players, as well as guest speakers and experts in the fields of biomechanics, diet and nutrition, mental toughness, and strength and conditioning.

Green Dot FRA 2019

With the fast growth and positive results of the FRA, we have decided to launch a developmental Green Dot FRA- which will start in the fall of 2019. Younger players will be taught proper mechanics, footwork patterns, and shot selection as they train to eventually transition to the yellow ball. We will make several local trips to area Level 7 tournaments. These players will be given 8-12 hours/week with guaranteed indoor/outdoor courts.

A Tennis Academy for College Preparation

For many years, the FRA has been traveling around the USA to the major sectionals, as well as competing locally as a team. FRA players have performed very well locally- and at the sectional level. We have dozens of players that play #1 for their high school. We also have many players that have sectional and national rankings. We even have several graduates all over the country playing college tennis on scholarships! See our website: williamstennisschool.com for a complete list of our FRA graduates, alumnis and testimonials.

Work hard, have fun, reach your highest potential!

The FRA offers a fun and respectful environment where kids feel part of a team and family. Our philosophy is that level based play is the number one way to improve at tennis. We use UTR (Universal Tennis Rating) to determine class placement and to guarantee that every player is challenged. We believe that age and gender is one of the worst ways to group kids. Objective skill level will always be our primary consideration when it comes to court placement. In other words, 8 UTR players should hit with 8s, 7's with 7s, etc. Level based play and competing is the number one way to progress and develop as a tennis player.
